Mar. 9, 1889 - Apr. 10, 1890

Box 20 NC-152 Entry 6

# MANN'S

# PARCHMENT COPYING PAPER.

(TRADE-MARK REGISTERED.)

This Parchment Paper is **MUCH STRONGER** and shows a **CLEARER COPY,** than any other ever made for the purpose. The Ink is **LESS LIABLE TO SPREAD,** and can be written upon with a pen.

## DIRECTIONS FOR COPYING.

Place a piece of blotting-board under the leaf of Copying Paper; then with brush, wet the leaf. Take off surplus water with another sheet of blotting-paper; then place the written letter on the leaf, (leaving the blotting-paper under the leaf, to take up any excess of water that may yet remain,) place it in the press, and in 10 or 15 seconds a perfect copy will be secured.

The leaves WILL DRY AS SMOOTH AS SILK by placing the book in the Press after Copying.

☞Place the oil sheets between the copies just made, to prevent blending or setting off.

## Another way when many letters are copied.

Procure a tin or iron box with lid to hold 20 blotting pads.—(Boxes furnished if desired.)

Dip half the lot of blotters in water, let them drain off a few moments; then place a dry blotter between each wet one, give them a few minutes squeeze in Press and they will remain wet for three days; then take an oil sheet, place it to the left; then lay a wet blotter; then turn leaf of Copying over on blotter; then lay your letter on; then another oil sheet, and so on, and you can copy all your letters at one time, thereby saving time. With a little care and experience as to wetting at first, you will be so well pleased, as never to go back to old way.

Mail of the United States at Philadelphia,

March 11th 1889.

Sir

I draw this day that

| | | | | |
|---|---|---|---|---|
| No. 7637 | from | Nesslage Colgate & Co | for $19,181.89 | ✓ |
| 7638 | " | American Ex. Nat. Bank N.Y. | $23,284.79 | ✓ |
| 7639 | " | Handy & Harman | $17,262.11 | ✓ |
| | | | $ | |
| | | | $ | |
| | | | $ | |

in payment for Silver Bullion.

I am, very respectfully,

[signature]

Superintendent.

Honorable Treasurer U. S.

New York.

11: March 9

Sir

I received from Handy & Harman of New York the following 17 bars of silver on account of the sale by them of fine silver to the Secretary of the Treasury on the 8th inst. @ 93 40 per ounce fine:-

| | | |
|---|---|---|
| 1 — 992½ | 7 — 994½ | 13 — 990 |
| 2 — 989 | 8 — 992 | 14 — 991½ |
| 3 — 988 | 9 — 991½ | 15 — 991½ |
| 4 — 991½ | 10 — 991½ | 16 — 995 |
| 5 — 991½ | 11 — 991½ | 17 — 994½ |
| 6 — 989½ | 12 — 989 | |

That party sold and the Government bought, fine silver, which these bars, according to our assays, certainly

are not, as you will see by reference to the Assay fineness. I cannot receive them in their present condition and it is unjust to this institution to require us to melt them for the accommodation of the vendor.

These bars are from the Pennsylvania Salt Company's refinery at Pittsburg, an establishment which has given us trouble with their bars on several former occasions. The contract of sale was for fine silver, and, upon ordinary business principles, fine silver should be delivered in fulfilment of the contract. If that refinery does its work in so unskilful and slovenly a manner, it can have no just grounds of complaint if the bars it turns out are rejected when offered on account of a sale of fine silver.

It is an injustice to this institution under the Current heavy pressure upon it for Coinage, to be obliged to remelt such bars for the accommodation of the vendor, and I submit that the only proper Course would be to reject the bars of this description that are offered on account of Government sales. I submit the case for your opinion and will reject these bars with your sanction

Very respectfully

Mark Ashton

12: March 9

Sir;

I have the honor to request that you will make requisition upon the Bureau of the Department for one "Cashier's Gold and Silver Coinage and Bar Accounts", ruled and printed and bound, as per enclosed sample leaves, and directions.

The book must be ready for the Cashier's use at the beginning of the fiscal year - on the 1st July next.

As this gives more than the required three months, I presume that this requisition cannot be regarded as irregular

Very respectfully

A. M. Fox

Superintendent

Hon. James P. Kimball
Director of the Mint
Washington
D.C.

12: March 9

Sir:

In reply to yours of the 11th inst. with regard to the credit to be given to silver bars from the Chicago Refinery referred to, I have to state that there are two refineries entirely separate and distinct "The Chicago" and "Aurora" and there is a wide difference in the character and quality of their output.

The Chicago Refinery turns out better bars, correct in weight and fineness. The "Aurora" are not near as good; are rather brittle; short in weight, and do not assay as well as the Chicago, and we keep them separate as a matter for facility of identification.

We have no official knowledge here that these refineries have been consolidated under the firm name of "The Chicago and Aurora S. and R. Company". But if this be the case, we will hereafter as you direct, credit the deposit from both refineries under the new firm name, but I should be glad to be officially advised of the Consolidation.

We are governed by the name which we find stamped on the bars

Very Respectfully

Dahl McFox

14: March 9

Sir;

In reply to the inquiries addressed to you by the Master of the Mint at Bombay India, and referred to me by your endorsement of the 11th inst., and both herewith returned, I respectfully submit the following statement of facts:—

1st The dimensions of our silver "ingots" as we call them, are as follows:—

For Dollars 12 inches long, $1\frac{5}{8}$ inches wide and $\frac{1}{2}$ inch thick

For Half Dollars 12 inches long, $1\frac{3}{8}$ " " "
$\frac{1}{2}$ inch thick

For Quarter Dollars 12 inches long, $1\frac{1}{8}$ " " "
$\frac{1}{2}$ inch thick

For Dimes (10 cents), the dollar ingots rolled.

2nd. Our ingots are first broken down by being put through heavy rolls 7 times, then annealed, they are then put 3 times through the finishing rolls and again annealed, preparatory to final adjustment on the draw-bench.

3rd. The length of the silver dollar strips or fillers is about 50 inches but they are cut in lengths for convenient handling at the cutting presses and the blanks are cut out one piece at a time. For dimes two blanks are cut at one stroke.

4th. Blanks are weighed before stamping. Small adjusting balances are used for weighing, also 2 automatic weighing machines that will each weigh 40 blanks a minute. These weighing machines were manufactured near Vienna, Austria, and cost 1200 francs, each.

5th. About 8 per cent of lights and heavies are rejected

6th. The planchets are annealed in open pans

7th. Our Coins are all struck on toggle or nickle-joint steam presses. They bring up the coins perfectly well. They are worked on silver dollars at a speed of about 65 pieces a minute. The bearings sometimes heat. Our small presses put on a pressure of about 10 tons at each stroke. We have larger presses that give a blow of from 40 to 80 tons: one, indeed, and our largest press, "The Ajax," can put on a pressure of about 120 tons, when required. The Coins are not rung by hand to test their sonority but defective strips are always picked

and rejected

Very respectfully

[illegible]

Madam/

Information has been lodged at this office that you have declined to do the work laid out for you, and complaint has been made that you are in general insubordinate. With this information to me, I want to call your attention to a sence of duty, and not to be obliged to take any summary steps with regard to your position, as I would rather you would be occupied here, being obedient to the orders you receive, than to issue any peremptory order with regard to you.

I will expect you to be dutiful, prompt in attention to your work, and respectful to your superiors, and also

punctual in your attendance at the hours laid down for your arrival in the Asylum.

Respectfully

Supt

Hon. Will A. Freret
Supervising Architect
Washington
D.C.

19: March 9

Sir

I telegraphed you to day requesting the withholding the awarding of Contract to bidders for excavating and underpinning until I could communicate with you, and inform you of some facts in connection with that work, which have been brought to my notice in a Consultation with Mr. Fawcett (the Superintendent of Construction) this morning.

He informed me that in order to place the Machine Shop in the basement, it would be necessary to tear out all the division walls therein, remove entirely the floor of the Lecture room, and also that of the Second Story; both being located under the Eastern portion of the

the building and this to allow of the underpinning of the walls.

I made my protest against such action, first, for the reason that the large coinage of standard silver dollars demanded of this institution, together with the minor coinage, will not admit of the prolonged suspension of business to accommodate such a radical change; second, the great expense which would necessarily be involved.

I laid these facts before him, and he taking the matter under consideration is now of the opinion that the underpinning of the basement walls under the coining room can be accomplished without tearing out the floors, as he had at first supposed. I hasten therefore to bring the matter to your notice so that you can make an adjustment to the new understanding, if the work originally thought of was involved in the proposal

advertised for.

Mr Earnest also informs me that the main stack is to remain in its present location and suggests that it is to be elevated some 30 feet higher. Is not this a mistake, and should not the stack be built on the North West Corner of the property as originally spoken of in order to protect us from complaints which may perhaps be made by the Grand Life and Trust Co. whose building immediately adjoins our melting rooms and refinery?

Oblige me with a line in reply

Yours very respectfully

D. H. Fox

Sir;

I have had search made amongst the archives of this Mint for the "plans and specifications of the machinery for the old Mint at San Francisco annexed to certain contracts of Joseph E. Curtiss" specified in your letter of the 22nd inst, without finding any trace of the same, and no one now in the Mint has any knowledge or recollection of any such documents.

There is about a wagon load of old brick still down at the Post Office building including papers and documents of various kinds, other than books, which have not been cleaned and examined. If the desired plans

and specifications are still in existence here, they would probably be found in the lot referred to. It would however be a month's work to clean, arrange, and classify them, and some person would have to be specially detailed for that purpose.

Very respectfully

29. March 9

Sir,

I herewith submit for your consideration a copy of a proposal from the Edison Electric Light Company of this City to light this Mint building with their incandescent electric lamps as a substitute for both gas lighting and our present electric lighting.

It may be safely admitted that our present double system of lighting is very far from satisfactory and the proposed substitute commends itself strongly to my judgment.

With your approval I propose to accept the proposition of the Edison Company and have the substitution made as soon

it may be practicable: if adopted, there will be some slight changes in the location and number of the lights submitted in these lists, but this does not affect the general proposition.

I do not think it would be advisable to operate a plant of our own.

Will you do me the kindness to advise me of your conclusions with regard to these as soon as may be convenient?

Very respectfully

Superintendent

Prof. James P. Kimball
Director of the Mint
Washington
D.C.

The Edison Electric Light Co., of Philadelphia

Philadelphia March 29. 1889

Hon. Daniel M. Fox,
Director U.S. Mint. Philadelphia Pa.

Dear Sir

We have examined the wiring of the Incandescent light plant in the Mint, and in the interest of perfect safety, and workmanship and an efficient light we are obliged to pronounce unavailable for either the Central Station System or enlargement of the present plant. To light the building properly, substituting for the present system throughout, the lights should be located as follows;

| | | | |
|---|---|---|---|
| Directors Room | 3 Lights | Laboratory | 5 Lights |
| Hall | 8 " | 3rd floor Dining Room | 12 " |
| Cabinet Room | 8 " | First Floor | |
| Chief Clerks Office | 2 " | Melter & Refiner | 4 " |

| | | | |
|---|---|---|---|
| Bookkeepers Room | 8 Lights | Melters Vault | 1 Ligh. |
| Medal " | 4 " | Stall | 2 " |
| Wash " | 1 " | Deposit Melting Room | 44 " |
| Machine Shop | 12 " | Annex " | 5 " |
| Engravers Dept. | 12 " | Rolling " | 20 " |
| Stall | 1 " | Whitening " | 8 " |
| Adjusting Room | 34 " (8-2 lt.) | Passage to Coining Dept. | 9 " |
| " " | 8 " (8-1 " ) | Coining Room | 34 " |
| Stenographers " | 8 " | Guard Dept. & Weigh " | 6 " |
| Plumber Shop | 4 " | Coiners Vaults 1.2 & 3 | 3 " |
| Assay Office | 3 " | Coiners Office | 4 " |
| Wt. Room or Laboratory | 6 " | | |
| Stall & Deposit, including Vaults | | | 11 " |
| Cashiers Office | | | 6 " |
| Warrant Clerks " | | | 4 " |
| Medal Room | | | 3 " |
| Cellar | | | |
| Stall & Vaults | 14 lights, These vaults will have receptacles with cords and switches. | | |
| Store Room | 4 " | | |

| | | | | |
|---|---|---|---|---|
| Blacksmith Shop & Hall | 7 | Lights | Engine Room Hall & Boiler Room | 26 |
| Carpenter " | 4 | " | Sweep Cellar | 8 |
| Dressing Room | 6 | " | Hall & Dressing Room | 6 |
| Work Cellar & Hall | 8 | " | Cellar | 12 |
| Engravers Dept. | 2 | " | Dynamo Room | 6 |
| | | | Grand total, | 408 |

We will wire for these lights using the best rubber covered wire placing the same in moulding, all cut outs to be porcelain, the wiring to be done on 3 wire system for purpose of connecting with the Edison Central Station. All Vaults to have receptacles on the outside with a Cord and Key Socket attached. All Vaults to have a switch, Certain other lights throughout the building to be supplied with switches. All Lamps to be supplied with Key Sockets. The Lamps to be attached to the present gas fixtures wherever it can be done. Where this cannot be done or where it is not wanted we will suspend the lights on

flexible cable. The main wires, [illegible] be [illegible]
sufficient capacity to carry the light [illegible]
be needed in the new part of the [illegible]
The Cost for above work including [illegible]
joints, moulding, all sockets, wires and [illegible]
is ready to be connected to the Meter, will
be Twenty one hundred & forty [illegible] $2142.00 [illegible]

If the new part to be built is to be of
iron and Stone, additional lights will be [illegible]
vided at Three dollars & Seventy Cents per
light. About 50 additional will be [illegible]
for the new section. After the above [illegible]
is done this Company will introduce [illegible]
service from the Street, place its Meter [illegible]
supply the lamps without charge to the
consumer. The current will be charged
[illegible] Meter at 1 1/8 cents per lamp hour,
[illegible] circular enclosed. All lamps
[illegible] will be made free of charge

5.

We believe that the Central Station Service will be much more satisfactory to you than a plant, but if desired we will be glad also to give you an Estimate for a plant, giving you in addition an Emergency connection with the Street.

Yrs Very Respy

(Signed) Wm. D. Marks

Supervising Engineer & Genl. Manager

63

The Edison Electric Light Co., of Philadelphia

Philadelphia March 23d 1889

Hon Daniel M. Fox
Director U. S. Mint Philadelphia.

Dr. Sir

Supplementary to our letter of March 9th which gave you the cost of wiring your building throughout for incandescent lighting, I desire to present the following points for your further information.

First. You are now using a 100 light machine supplying a portion of the building. The work of putting in this plant was done several years ago, and the wiring is so poorly done that it is not free from danger. The lamps are not giving satisfactory candle power, owing to loss of current and other causes. The changes in the building will

cut off, steam piping connecting with this plant, and necessitate radical changes therein.

Second. For making changes to continue the present Electric Lighting we would advocate extending the electric light throughout the building, for the following reasons; Some of the rooms in the Mint, particularly the Adjusting Room, would be rendered almost untenable by the use of gas; Many persons being crowded together within a limited space. The incandescent lamp does not consume Oxygen, gives out no heat and does not throw off ammonia, carbonic acid, or sulphurated hydrogen. Ceiling and decorations are not blackened by its use. Silver and other Metals are not tarnished as is the case when gas is used.

The light is perfectly steady and free

ree flickering, therefore it is less injurious to the eye than gas light.

Third -

As to cost - While we have estimated for placing in the Mint 400 lamps, the use of all these lamps will not be constant. They are provided where gas burners now exist to meet any call or emergency. From the testimony of your subordinates we estimate that from 100 to 20 lamps average 8 hours per day each 110 lamps 8 hours per day 312 days per annum, amount to 274560 lamps hours per annum. The cost at 1 1/8 cents per lamp hour would be $3088.80. We presume that you have not underestimated your burning hours and that this is a fair estimate of the cost for light per year in the present building.

In the extension when made, there will be
a moderate consumption of current.
Our building is of such a nature and
burning hours so irregular that to op-
erate a plant of your own, we believe
would be much more expensive. We are
ever ready at any time to meet your
requirements either for Central Station
Lighting or for a plant.

Yours very respy

(Signed) Wm. D. Marks

Supervising Engineer & Gen. Manager.

29 March 9

Sir,

If practicable will you kindly favor me with a copy of the Annual Report of the Supervising Architect for the Calendar year 1888. It contains a perspective sketch of this Hall after the proposed alterations have been completed and for that reason I very much desire to possess myself of a copy.

James P. Kimball

Mint of the United States, Philadelphia,

OFFICE,

1. April 89

Sir

Earnestly thanking you for your letter of the 8th ulto. in reply to mine of the 6th ulto. with regard to the application of one A. Squires from Colorado County, California, for the payment of a gold deposit made at this Mint in his name on June 11. 1853, I herewith transmit - for the files of your office - in compliance with your request, a copy of the testimony taken by United States Commissioner Forbes, at Wheeling, West Virginia, to establish Mr. Squires identity.

Mr. Squires presented himself at the Mint on Saturday last and got his money.

and now with the approval of my account when it reaches you this transaction will be closed

Very respectfully

Superintendent

Hon: M. J. Durham
First Comptroller of the Currency
Washington
D.C.

United States of America.

District of West Virginia. S.S.

Depositions of Witnesses, taken before me, Hannibal Sinnes, a Commissioner of the District Court of the United States, for the District of West Virginia, at Wheeling, in said District, on the 10th day of February A.D. 1859, at my office, in the U.S. Judiciary building of the said City. To be used by Mr. Alexander Squires, in furthering or prosecuting his claim against the United States, for about the sum of $2201.00 for 124 29/100 ounces of Gold Dust, deposited, by him, in the U.S. Mint, at Philadelphia Pa., on or about the 9th. day of June 1855.

Alexander Squires, claimant, of lawful age, being by me first duly sworn, deposes and says:

My name is Alexander Squires. I was born in Richmond Virginia, about the year 1815, but I do not know the exact time. In the year 1830, I was, by the Cabbans Court, in Richmond, bound out to

from the trade of a Cooper; and the Court at that time record'd my age as 15; I now have but little or no recollection of my parents or relations, and am not aware of having any relations living.

Wm. Henry J. Wade, with whom I am now stopping, while in Wheeling W. Va., was a playmate and Schoolmate of mine, while we were both very young; and he was, by the same Court, at the same time, bound out to the same man, to learn the same trade; finished our trades at the same time, went West, from Richmond, together, in about 1837, and worked together, boarded together, & left together, and in fact we were almost inseparable, from 1830 to 1839, when he was married, and then our paths lead in different directions, but since his marriage I have always made his home my home, when I was in Wheeling W. Va., where he has lived nearly all the time, since his marriage.

I was never married, myself. Wade and I

were about the same age and size. After [illegible] best I first worked in Cincinnati Ohio, at my trade, for a man, I think, by the name of [illegible] bury. I remained there, possibly, 18 months [illegible] two years, and after working at several other places, for short intervals I went to Wheeling W. Va. about the year 1840, and was at Wheeling W. Va. working at my trade as a Cooper, the most of the time, 'til 1850, although several times I went away from Wheeling to work; but always [illegible] upon Wheeling as my home, or headquarters; I suppose, because Mr. Wade and his family were there, 'til I went to California in 1850, as hereinafter [illegible]. I went to California in 1850, started in January, I think, and have been in that state ever since with the exception of two trips I have made East; one in 1851 or two, and one in 1855, the time I made the deposit at the Mint in Philadelphia times I spent the most of the time with Mr. Wade

4

and his family at Wheeling W. Va. and I think I remained there from six to eight months each time. I have not been East since I made the said deposit, until about a month or so ago, when I have visited the Mint, and I was unable to get the money, and for that reason I am now having these depositions taken. Since going to California I have spent the most of the time working in the mines, and for the most of the time, being in good health, and not having any family to support, and living myself in a plain, humble manner, my expenses have not been many; hence I have always had some money ahead, and have never needed this amount, deposited as herein set forth; and knowing it was in the hands of Uncle Sam, and in Gold, I always felt perfectly secure, and therefore never before made any effort to get the deposit or its value, until the present time. I am now residing in Calaveras Co. P.O. Mokelumne Hill, and I

5

I have lived in this County for a good many years, but have been over a good deal of the mining portion of California; have never made many friends or acquaintances, being rather retired in my tastes and habits, living nearly all the time in the Country, and the population has been of a changing or shifting character. have never drank or gambled or engaged in any business that would throw me in contact with many people, so I judge. I am really not known by many persons. In June 1855, I think about the 9th. of June, I went to Philadelphia Pa. and deposited, in my own name, 124 96/100 ounces of gold dust, in the United States Mint, did whatever was required of me by the officers of the Mint, and received a receipt or certificate for the same, which identical paper I now have in my possession, but in a torn and faded condition, which renders it almost useless for the object for which it was intended. After receiving said certificate

and in fact almost ever since, I have worn it in a belt of leather, around my body, and generally next to my skin; and working hard, and being out doors the most of the time, and exposed in all sorts of weather, the consequence was it was often wet both with perspiration and rain water, so that now it is so faded that but little of the writing with which the blanks were filled up can now be seen.

And several times I have had parties attempt to bring out the ink, by means of chemicals, but no one has ever succeeded in doing so, but if possible they have more completely discharged the ink.

I will file with the proper officers of the Mint, what remains of said certificate, whenever they may require me to do so. I have never received from any officer of said Mint, or any other person, the said gold, or the value thereof, or any portion thereof. I file herewith a photograph of myself, taken here in Wheeling, a few weeks ago. I gave

lady, in the Mint at Philadelphia took my photograph a month or so ago, when I applied for my money, but before I left Philada., I changed my old clothes for new ones, and had a part of my whiskers taken off, so the photo., taken here, will not be like the one taken there.

And further this deponent saith not.

A. Squires.

And at the same time and place, came another witness to wit: Henry Jackson Wade, of lawful age, and being by me first duly sworn, deposes and says.

My name is Henry J. Wade, and I reside in Wheeling W. Va., at No. 62. Jane St. I was born in Richmond Va, on the 16th of February 1816. I am well acquainted with Mr Alexander Squires, who is now here before me, and I have written my name across the back of his photograph, which I am told will be attached to this deposition. I have

known said Alexander Squires ever since I can remember anything. We were children together, and school mates, and when we were about 15 yrs. of age, or in 1830, we were both bound out, on the same day, to the same man, to learn the Cooper trade, and from that on until 1839, when I was married, we worked together, lived together, slept together and in fact, were never parted for any great length of time.

And from 1839, the time of my marriage, or 1850, when he started for California, he made my house his home, and as Wheeling was more his home than any other place, as he worked there more than any other place and as we both worked at the same trade, and in the same shop, I might say that the first 35 years of our lives were spent together. He went to California in 1850, but we have kept up our acquaintance ever since, by means of correspondence, and he has

visited us three times since his departure, once in 1851 or 2, once in 1855, and now at the present time; He always comes by vessel to N. Y.; and there by rail to Wheeling, and returns the same way; upon each visit he has remained from six to eight months. Upon visiting us in 1855, he told me of the deposit he had made in Philadelphia, and showed me the certificate he had received for the same. It was then fresh and new, and he has also shown me what I suppose is the remains of the same certificate, but it is about destroyed; and knowing Squire's peculiarities, I have no doubt it was destroyed just as he describes, in his description which I have read. I now have a letter in my possession, written to me by Squires, from California, in 1858, in which he speaks of this deposit. Upon that visit in 1855, he also made a deposit in a bank at Cincinnati Ohio, and some time afterwards he sent me the certificate for collection

and as it had been caused just as he says the other one was, I had considerable trouble in collecting it.

Said Squires is now here present, is in good health and condition for an old man, and looks just as natural as he did 30 or 40 years ago. I have resided almost continuously in Wheeling W. Va. for the last 50 years, and have been engaged in the shipping business the most of that time, and am in good health.

Mr. Squires has always been a man of simple habits, retiring in his disposition, and therefore never made many friends or acquaintances, and always being full handed, as we say, never felt the need of money, and I can very well understand how he would allow this money to remain so long in the Mint, without enquiring about it. My wife and several of my children know him well, and could identify him just as well as I can, if it would be required. I am not related to the said Squires

in any way and have no interest in his said claim in any way.

And further this deponent saith not.

H. J. Wade.

At the same time and place came another witness to wit. Henry A. UeHonan of lawful age, who being by me first duly sworn, deposes & says:

My name is Henry A. Uthman, I was 65 years old last December, was born in the city of Baltimore Md. and came to the city of Wheeling W. Va. on the 3rd. of January 1848. I am a cooper by trade, and have followed that business nearly all my life. I am acquainted with Mr. Alexander Squires, he is now present here, and I have signed my name on the back of his photograph, which I understand will be attached to his deposition. I first met Mr. Squires here in Wheeling in the Spring of 1848, I think, He was then working at the coopering business

with Richard McConnell, not in the same shop
with Mr. H. J. Wade, with whom I am also well
acquainted. I was then working at the same business
here in Wheeling. He went away some time after
1848 and I understood that he had gone to
California. I saw him again here in 1855.
He was here at the time stopping with Mr. Wade
and his family. I now have no trouble in recog-
nizing him as the same Alexander Squires. I
knew in 1848 and 1855, although I have not seen
him since 1855. He was always well behaved and
bore a good character but was what you would
call a backward kind of a man.
In 1848 I was a man grown, and he was older
than I was. And further this deponent saith not.

H. A. Uthman

And at the same time and place came another witness to wit: John Hutton, of lawful age, who being by me first duly sworn, deposes and says.

I was 63 years old the 15th — of last May; am a wagon maker by trade; I was born over in Ohio, opposite here; was brought here when I was 4 years of age and have lived here ever since. I am acquainted with Mr. Alexander Squires, who is now present, and upon whose photograph I have signed my name, and understand it will be attached to this deposition. I first met him in 1851 or 1852; it was one one of his visits here from California; I lived close neighbors to Mr. H. J. Wade, and Mr Squires was visiting him at the time, and I had frequent opportunities of seeing him and getting well acquainted. I have not seen him from that time until his present visit here; and although he has changed somewhat, and is much older, I have no trouble in recognizing him; and I have no doubt in the world but he is the same Alexander

Squires I met and knew well in 1851 or 1852. He was a quiet well behaved man, of good character, but did not seem to make many acquaintances; he always seemed to make Mr Wade's house his home, while he was here. I am not related to Mr. Squires in any way, nor have I any interest whatever in his claim against the Government.

And further this deponent saith not.

John Fulton.

At the same time and place came another witness to wit: Miss Elizabeth Ann Wade of lawful age, who being by me first duly sworn, deposes and says. My name is Elizabeth Wade; I am the daughter of Mr. Henry J. Wade who has already been examined in this matter; I am 49 years of age; I was born here in Wheeling W. Va., and have lived here about all my life. I am well acquainted with Mr. Alexander Squires, who is now here

present, and I have written my name upon the back of his photograph, which I understand will be attached to his deposition.

I can remember him well since 1855, at which time he came on from California and visited my father family; I should judge that he was, at that time, about 40 years of age; He was an old friend of my father and always made our house his home, while in this part of the country. I can also remember a visit he made us in 1851 or 2, but my recollection of him at that time is not so distinct, as it is of the visit in 1855. My understanding always was that he lived in California. I often saw letters that came from him to my father, and he also wrote to me several times, and I also wrote several times to him, while he was in California. I have no trouble now in recognizing him or identifying him. In 1855, I heard him speak about making this deposit of gold in the Mint at Philadelphia Pa.

He is somewhat retiring in his habits, and does not make many friends or acquaintances, but he is always well behaved, and a man of good character and habits. And further deponent saith not.

Elizabeth Ann Wade.

And at the same time and place came another witness to wit, Mr. Robert Lubee, of lawful age, who being by me first duly sworn, deposes and says; I was born in Wheeling W. Va., in the year 1831, and have lived here nearly all the time; When a young man I learned the Carpenter business with my father; but have been engaged in the livery business for a good many years.

I am acquainted with Alexander Squires, who is now here present, and upon the back of whose photograph, I have signed my name, and I understand the same will be attached to this deposition. When I first remember Mr. Squires,

I was working at some light work or playing around my father's Carpenter shop, and Mr. Henry J. Wade, who is also now present with his family, was living in a house which was up on the same lot; and this man Sayers was working with Mr. Wade, at the Coopering business, and boarding or living with Mr. Wade, at the same time: They were then both working for a man by the name of Bennett; this I think was along about 1846: Afterwards, I remember of him being about here for two or three years, working and living at or near the same place. When he left, my understanding was, that he had gone to California; I understood that he was back here again in about the year 1855, but I have no distinct recollection of seeing him. He has changed considerable, since I last saw him; but is still going looking for a man of his age: When I first knew him, I would judge that he was a man about 30 years of age. I have no trouble in identifying or recognizing him, and

have no doubt in the world but he is the same identical Alexander Squires which I knew so many years ago. He was, as far as I knew, a man of good character and well behaved, but a little backward, or retiring, in his disposition. I am not related to him in any way, nor have I any interest in his claim against the Government, mentioned in these depositions.

And further this deponent saith not.

/ Robt Locke.

And at the same time, and place came another witness to wit: Mr. James W. McConnell, of lawful age, who being by me first duly sworn, deposes and says.

My name is James W. McConnell, and I was born here in Wheeling W. Va., on the 3rd day of September 1836, and I have lived here nearly all my life; this has always been my home: I am a Cooper by trade. I am acquainted with Mr. Alexander Squires, who is here present, and I have written my name

upon the back of his photograph, which I understand will be attached to this deposition. When I first knew Mr. Squires he was working for my father, who was a tinner also, and at that time had a shop up on Market Street, in this City. I think this was in 1847, 1848 or 1849, along there. I think that he worked here at the tinning business for several years, and I think, he was living with Mr. Henry J. Wade, at that time; and Mr. Wade is now here present. Mr. Squires was then a man grown, perhaps, 30 yrs. of age, and I was a pretty big boy. I have no recollection of seeing Mr. Squires from that time on til about 3 or 4 weeks ago, but I always understood that he had gone to California, and was living there. When I first met him here lately, I didn't know him, but after talking to him awhile I had no trouble in remembering him; he has changed somewhat, but I had no trouble in recognizing him, and am perfectly satisfied that he is the same man

I knew in 1847 or 8, as Alexander Squires. So
far as I knew he was a man of good character.
I am not related to him in any way, nor have I
any interest in his claim against the Government,
which these depositions are taken, as I have
informed.

And further deponent saith not.

James R. McConnell

And at the same time and place came another
witness, to wit: Mr. William Gray Sr., of lawful
age, who being by me first duly sworn, deposes and
says. My name is William Gray Sr. and I was
born here in Ohio County W. Va., on the 8th day of
Nov. 1826, and I have lived in Wheeling W. Va.
about all my life. I am a cigar maker by trade.
This has always been my home. I know Mr.
Alexander Squires, who is now here present, and
I have signed my name upon the back of his ha[illegible]

[illegible] here lately, and I understand, it will be attached to his deposition. I first met him I think in [illegible], at the cooper shop of Mr. Henry J. Wade, here in the city; he came here and made his home with [illegible] Wade: He had been to California, as I understood, and was back on a visit. He was then a man, [illegible] of 40 or 50 years of age. I didn't see him again till here lately, when he is here again on a visit to Mr. Wade's, from California, as I am informed. I had no trouble in recognizing him, just as soon as I saw him, and I am perfectly satisfied that he is the same man I met here.

[illegible] 1855, and who was known then and is now, as Alexander Squires. When I knew him he was a man of good habits and character, but backward and retiring in his habits and disposition, and did not have a great many friends or acquaintances, outside of the family of Mr. Wade. I am not related to him in any way, nor have I any interest

his claim against the Government.

William Gray Sr.

United States of America,
District of West Virginia: S.S.

I, Hannibal Forbes, a Commissioner of the District Court of the United States for the District of West Virginia, do hereby certify that the foregoing depositions were duly taken, subscribed and sworn to, before me, at the time and place and as hereinbefore set forth, and for the purpose as therein set forth. And I further certify, that I am well acquainted with the witnesses Henry J. Wade, Henry Althman, Robert Luke and William Gray Sr. and have made special inquiry as to the other witnesses therein named, and believe them all to be good and reliable witnesses, and as such, worthy of full credit. I further certify that

I am not related to the said Alexander Squires, the Claimant, nor to any of the said witnesses, nor have I any interest of any kind in the said Claim.

In witness whereof I have hereunto set my hand and affixed my official seal as Commissioner aforesaid, this 16th day of February 1889.

Hannibal Forbes.

Machine Shop

April 3rd 9.

Chas. H. Fox,

Superintendent

Dear Sir.

I herewith enclose for your consideration a tabulated form, giving the results of an experimental rolling and cutting of Silver Dollar Ingots, without annealing or drawing.

The Table shows. First, five measurements of thickness of each planchet, and the average thickness as a result.

Seconds. The original weight of each planchet as cut from the rolled fillet.

Third. The weight after the recutting of each planchet by the means of a punch and bed, having a less diameter than the

original.

Fourth. The amount of reduction in weight by the re-cutting process on each planchet.

Fifth. The weights after re-cutting of such heavy planchets as would have been necessary to bring them within easy adjusting limits.

Sixth. The original weights of such planchets as were already within adjusting limits, without recutting.

From the several items as tabulated it would appear that ingots may be rolled to the finished thickness without annealing, and such heavy planchets as are found among those cut from the fillets, may by the recutting process be brought within adjusting limits and thus

ade a large proportion of planchets available for coin.

The saving by this method would be to the Coinage in the annealing and drawing of fillets. The cost of fuel, repairs to annealing furnaces, and the working of metal free from oxidation.

That the work may be properly done, and desirable results obtained, it would be necessary that Rolls with harder faces, and Cutting Presses of more rigid construction should be used.

That many planchets are reduced below the proper weight by the punching of planchets from annealed fillets, there can be no doubt, as the metal in the annealed fillet is drawn by the punch to the periphery of the planchet and removed

by punching, leaving the edge thinner than the centre, this may vary with the condition of the annealed fillet, and the sharpness of the punch and bed.

You will observe that the average difference in thickness of the 77 planchets is about 1¼ thousandths of one inch, that this may be improved by good roll's and careful attention is probable.

My recent letter to you submitting design for hardened steel shell rolls, was intended as a means of supplying such a roll as would retain perfect truth of face for a considerable time.

Very Respectfully.

5 April 1879

Sir,

On the 1st inst. I received a certificate from the president and secretary of the United States Express Company, - form 1779 - conferring authority upon Agnus S. Sedgwick their general agent in this City, to act as the financial officer of that Company; accompanied by a note from Mr Sedgwick informing me that their Mint Agent Mr. W. S. Fisher, was authorized to receipt for monies from the Mint.

Supposing that the Mint agent of the United States Express Company should have the same authority that was conferred upon the Mint agents of the Adams Express

Company, I requested Mr Sedgwick to have his Company give Mr Fisher a full power of Attorney.

This, in a note received from him this morning, he declines to do, and to be on the safe side, I refer the question to you as to Mr Fisher's proper status in connection with the Mint, and to the Department for such decision with regard to it, as the authorities at Washington may deem proper.

I enclose in consecutive order a copy of form 1779, and the correspondence on this subject for your information, and will thank you for such instructions as may be deemed proper

P. April 9

Sir:

The 10 Coins specified in your letter of the 3rd. inst. purporting to be one-cent pieces, selected from a number found in possession of Counterfeiters recently captured by the officers of the Secret Service, have been submitted for inspection to the Coiner and Assayer, who report them to be, in their judgment, genuine coins. Three of them were destroyed by the assayer in testing the metal of which they are composed and I am therefore only able to return 7 out of the 10 sent me

Very respectfully

Superintendent

Hon: J. P. Kimball
Director of the Mint

Copy

April 5th 9

Hon. Daniel M. Fox-
Superintendent;

Sir,

Referring to the Directors letter of 3rd inst. relative to the Coinage of Gold Dollars of 1856. I have the honor to state, that upon comparison with the books, the amount stated in the Directors letter for the 1st 2nd & 3rd quarters, & months of Nov. & Dec. a total of 1.443.168 pieces, were correct.

For the Month of October of that year 319.768 pieces were coined making a grand total of 1.762.936 Gold Dollars delivered to the Treasurer for the Calendar-year 1856-

Very Respectfully Yours
A. S. Sterl.
Coiner.

Copy.

Mint of the United States at Philadelphia, Pa.
April 9th 1857.

Hon. Daniel M Fox, Superintendent,

Sir, In Compliance with your instructions I have examined the Coiner's books and find that for the Calender Year 1856, there were coined 329,878 Double Eagles, Aggregating in Amount $6.597.560.; Do. 60.490 Eagles, aggregating the sum of $604.900.; Do, 197,990 Half Eagles, aggregating $989,950.; Do. 384,240 Quarter Eagles, aggregating $961,600.; Do. 26,110 Three Dollars pieces aggregating $78.330.; and 1.762.936 Gold Dollars Corroborating the Correctness of the report referred to in the letter of the Director of the Mint, of the 4th inst.

The Enclosed Schedule will show the Monthly Gold Coinage in Value, and in the Number of Pieces, for the Calender Year 1856,

Respectfully Yrs, H. M. Crozer

Superintendent

Hon. James P. Kimball
Director of the Mint
Washington
D. C.

12: April 9

Sir;

Supposing that you have them in stock, I report the fact that we need 500 blank pay rolls No 48:- sample enclosed.

I should be glad to learn whether they can or cannot be furnished

Very respectfully

Daniel McFee

Superintendent

Hon: J. P. Kimball
Director of the Mint
Washington
D.C.

12th April 9

Sir;

I have no official information from your office with regard to any Contracts which may have been made for the proposed alterations of this Mint building, except being recently apprised of the acceptance of proposals of Estick & Co for excavations &c. The alterations will of course interfere more or less with the operations of this Mint which is now working under its maximum pressure. I think it of the utmost importance that I should have a personal Conference with you here at the Mint with regard to this whole subject and I write to ask

whether and when it would be convenient for you to do me the honor to make a call at my office for that purpose. The Conference should be had at as early a day as practicable.

Will you not do me the kindness to let me hear from you in reply, which will greatly oblige me and relieve me from no inconsiderable solicitude with regard to both the alterations and the operations of the Mint

Very respectfully
Dan McFox

D M Fox

Mint of the United States at Philadelphia, Pa.

SUPERINTENDENT'S OFFICE.

April 20th 1889.

Sir:

In response to your letter of the 18th inst. I beg leave to say in explanation, that by the Regulations (see 3. page 4) "the deposit is to be received and entered as of Gold or Silver as the fineness of the one or the other may appear to predominate."

A Gold or Silver receipt is given on inspection of the deposit; a Gold or Silver assay number is affixed, and any change in these is not free from liability to confusion, but of course such changes are made when the error appears to be of magnitude.

Out of some 1000 deposits for the Quarter, this guess, imposed by the regulations, seems to have been reasonably successful. Of the errors noted the only one emphasized is 2.7 and this admits of simple explanation. This deposit (27) was from

Silver & Gold Bars, and the wants of the depositor could only be met by receiving the deposit on the Silver list, and not because the Silver fineness predominated.

As to the other cases in error, it will be evident on inspection, that in a majority of them only one assay could determine in which category they should be received. Take the cases #1164 & #1442 for instance, where the assay showed a slightly higher Silver fineness while more ounces of Gold than of Silver were paid for.

A preliminary melt is required before assay, and this calls for an assay number to be stamped on the bar corresponding with its receipt. And thus having two series of numbers one for Gold and one for Silver, any change in classification would require an erasure and reclassment of this number, which is altogether objectionable. As many of these deposits are hand made, this is not an easy

matter to do, and yet retain perfect legibility.

Furthermore it may be said in explanation of why these few small deposits have not been transposed on our books after the assay showed an error in classification, that the depositor when he sends for settlement, is subjected to the inconvenience of an exchange of receipts, with the incidental annoyance attending a return of the messenger for second endorsement. Also that the cancellation of one certificate, and the issuance of another, causes a gap in the order of numbers, there being one series for Silver and another for Gold.

A Blotter for temporary entry would only partially meet the difficulty, since we would require in addition a temporary receipt book, with a temporary set of numbers, all to be corrected and for the first time in the Mint Records.

The depositor would not hesitate to criticize severely such a way of doing business with him, and

4

some already complain bitterly of our giving them Silver receipts for Gold deposits.

Only the survey of the entire procedure, and the various steps attendant on the receipt of a deposit at the counter, until its value is ascertained and paid to the owner, will give a clear view of the care required to insure perfect accuracy of classification, and difficulties and embarassments to be encountered to obtain such precision. We will do the best we can under the circumstances.

Very Respectfully.

Supt.

Hon. James P. Kimball
Director of the Mint.

23: April 9

Sir

Deposit memorandum dated April 17th showing the value of gold bullion shipped to this Mint by the Mint at Denver, April 12th — enclosed in your letter of the 27th inst., for correction — is herewith returned, accompanied by a newly made out memorandum — which is correct — as a substitute for the one enclosed in your letter

Very respectfully
H C Hirsch
Acting Superintendent

Hon: James S. Kimball
Director of the Mint
Washington
D.C.

23. April 9

Sir;

In reply to your telegram of this date I have to inform you that we have not coined any gold dollars of 1889: neither proofs nor for general circulation.

The Coiner has struck 69 proof 3-dollar gold pieces of 1889 but none have been issued. They are still in his possession. I have instructed him to suspend the coinage of these two denominations until further orders from you. I enclose a statement prepared by the Engraver of the one dollar and three-dollar dies for 1889 which

he has manufactured and delivered
and the number he still has on hand

Very respectfully
H C Hickok
Acting Superintendent

Hon: James P. Kimball
Director of the Mint
Washington

25. April 9

Sir:

The striking of medals when the dies are prepared is a matter of little or any difficulty, and an order for medals can be filled on short notice, but it will be impossible to fill your requisition of 23rd. inst. for the Army Marksmanship Medals called for by the Chief of Ordnance by the 1st. of July next, for the reason that so many of the medals desired will require dies to be specially prepared for the work and that cannot be done by the time specified.

The matter was submitted to our Engraver, and I herewith endose for your information a copy of his reply,

showing that it will be impossible to prepare the new dies and furnish the medals in the required time.

Very respectfully

H C Beck

Acting Superintendent

Hon. James P. Kimball

Director of the Mint

Washington

D. C.

Copy.

25th April. 9

Sir,

After a careful reading of the Directors Letter of the 23rd inst. I find to comply with the instructions therein, it will be necessary to engrave twelve obverse and three reverse dies for the medals, and five dies for the riders. Three of the designs for obverse of the medals require original models. I therefore think it well to state that it will be utterly impossible to execute this amount of engraving in anything like the time specified by July 1st 1889. To roughly estimate this work it would take twelve months to prepare these dies if I had no other work in hand, which is certainly not the case, as besides the regular coinage dies I am engaged upon the dies for the Presidential Medal and will also

have to prepare the dies for the Indian Race medal, all of which will keep us fully occupied for some months.

I can start the work and will do all I can to complete it as early as practicable.

If any one of these medals is required before the others, it would be well to let me know at once, as I can then prepare that one first.

Very respectfully

Chas. E. Barber

Engraver.

Hon. Daniel M. Tod.

Superintendent.

LRB

[illegible] Philadelphia, Pa.

SUPERINTENDENT'S OFFICE

April 27th 1889

Sir:

Will you kindly give me instruction as to the rates to be paid for transportation of Silver and Minor Coins to the District of Columbia, Arkansas, Arizona, Colorado, Dakotah, Idaho, Wyoming, Montana, New Mexico, Utah, California and Oregon, so that I may be prepared to check and pay the bills of the United States Express Co. when they shall be presented. I do not find the information in the Contract made with that Company.

Very Respectfully,

Sir,

The third Order for Bronze 1¢ blanks will be filled by the Contractor within a few days, and as our stock is now quite low, and anticipating a continuance of orders for Coin, I respectfully request authority to issue my order for an additional 50.000 lbs. of Bronze 1¢ blanks.

Very Respectfully,

Supt.

Hon. James P. Kimball,
Director of the Mint.
Washington.
D.C.

Encl.

April 29th 1909

Sir:

The inclosed bill in duplicate of Palmer, Cunningham & Co., for 89 cents, was through an oversight of the Warrant Clerk, inadvertantly certified and allowed to pass through the Cash accounts, and to be paid from the Appropriation for the current fiscal year. The bill is clearly an expense of the last fiscal year, and I have had it counter entried and respectfully forward it to you for payment from last year's Appropriation.

Will you kindly have a draft forwarded to me, so that I can repay the Warrant Clerk, who has refunded the money from his own pocket.

Very Respectfully,

Supt.

Hon. James P. Kimball.
Director of the Mint
Washington. D.C.

Mint of the United States at Philadelphia,
SUPERINTENDENT'S OFFICE.

9. May 1889

Sir

The following telegram sent you this day is hereby made official:—

We will try it, with discretion & overtime if needed. Advise me

Very respectfully

Dan'l M. Fox

Superintendent

Hon. J. P. Kimball
Director of the Mint
Washington
D.C.

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

10. May 1889

Sir;

In reply to the second paragraph of yours of the 9th inst., I have to respectfully state that my telegram of yesterday to which you take exception, was the joint result of a Conference between myself and the operative officers of the Mint to all of whom your telegram of the 8th inst., was regarded as sufficiently ambiguous to make it uncertain what amount you expected me to do under it. Dr Tuttle was of the impression that it might mean 1,000,000 silver dollars for two months Collectively and gave some reasons why he drew that inference In a matter of such

grave importance it was desirable that I should not act on an uncertainty or be in danger of misleading you in consequence of it. I could not know that your coinage of Silver dollars for the year was short, nor was it my business to inquire. I always take your orders as you give them, and endeavor to carry them out in literal good faith without undertaking to even conjecture why you give them. It is not my habit to make a positive promise on any subject, unless I am certain that I can fulfil it, and as the proposed alterations of the Mint buildings are not under my control and I do not know when they will be commenced, and have progressed so far as to stop our coinage

operations, it is not in my power to determine what Coinage I can get out in the month of June - for I do not know at what time in the month our operations must be suspended, though no fault of either yours or mine; and it would be very imprudent on my part and flagrantly unjust to you, in the position in which you find yourself, to promise you an output of Coin in June that we do not positively know can be made "without fail." On account therefore of the Contingency to which I have referred - and for which I cannot be responsible - it is my duty to you to frankly say that I cannot promise "without fail" to furnish the maximum Coinage for May and June,

3

that your telegrams call for. And in this state of uncertainty I suppose it would be a wise precaution to look to the Mint at San Francisco as you suggest to make up any possible deficiency.

I can only say in conclusion that I shall exert myself to the very utmost to get out the largest amount of Silver Dollar Coinage in May and June that may be at all possible

Very respectfully

Superintendent

Hon James P. Kimball
Director of the Mint
Washington
D.C.

Mint of the United States at Philadelphia, Pa.

SUPERINTENDENTS OFFICE,

11 : May 89

Sir;

The following telegram sent you this day is hereby made official;

Tuttle says but for stoppage preparing settlement he would require no overtime; but to stop June twentieth will need two to four hours overtime for thirty-eight men to get supply gringots ready

Steel says one hundred Adjusters may require two hours extra four times a week; also nine men for the cleaning room two hours

four times a week: five relief men in rolling room to cover absence by sickness, and two men for automatic weighing machines

If so instructed I will carry the account without fail. The above is the closest estimate possible to make of overtime

Very respectfully

Superintendent

Hon: James P. Kimball
Director of the Mint
Washington
D.C.

13: May 89

Sir;

In reply to your suggestions on the subject, in the closing paragraph of your letter of the 10th inst, I have to state that 95% alcohol is used in small quantities in the assayers laboratory, and also, by the Engraver in cleaning and polishing dies. It is extensively used by the Coiner to clean 1 cent and 5 ¢ blanks also to clean dies: and for neither of these purposes will methylic alcohol answer. We have given it a fair trial for the purposes indicated and it has always proved a failure.

Very respectfully
Dan'l M. Fox

Respectfully referring to your circular letter of the 10th inst. with regard to the heating apparatus of this Mint, I have to report that the building is mainly heated by steam and that it is defective and to a considerable extent insufficient.

If such changes could be made as would enable us to utilize the exhaust steam for heating purposes it would be a very great improvement and I think it would be fully sufficient for the purpose

Very respectfully

May 22 1889

Dear Sir:

In reference to the request of the Director of the Mint, asking that I shall aid Mr Pound in some further experience in assaying, pending his nomination as Assayer to the Mint Bureau, I would suggest that by placing his name upon the pay roll of my department, (even though it may be temporary), would further this object in a degree above any other plan which I could suggest. In the first place Mr Pound would be directly under my control in all his movements & could be entrusted with any work which might be placed in his hands, while he would not be one with a mere visitor or onlooker. In the second place I desire to fit Mr Pound as efficiently for the position to which he has been nominated.

well is to do the best I can for the Mint Bureau. In the third place we are pressed to the utmost in this department, with the large amount of work of late, especially with the Silver, and in Mr. Pound we would have a valuable and much needed help.

Very respectfully,
Jacob B. Eckfeldt.
Assayer.

Hon. Daniel M. Fox.
Superintendent.

Sir;

We need 4000 Manilla envelopes like the enclosed sample to use in making up $5.00 packages of 5-cent pieces - to pay out over the Cashiers Counter.

In reply to a former requisition for these envelopes I was informed by the stationery division that they could not supply us, and those they could furnish we found were not suited to our purpose and were neither strong enough nor of the right size. I therefore ask authority to procure these in Philadelphia

Very respectfully

Sir

Accompanying this you will find copy of a letter from Farrell & Co. addressed to me dated 27th ultmo. touching the subject of lowering the floor of the new basement vault and accompanying spaces, and also a letter upon the same subject from Doctor Tuttle, Melter & Refiner of this Mint to me dated 28th inst.

I enclose them for your reading and beg to ask that you will refer them to the Supervising Architect for his consideration and decision.

I shall be happy to have a letter from him respectively at earliest opportunity, also one from yourself upon

will take the same matter into consideration

Very respectfully

Superintendent

Hon. James R. Kimball
Director of the Mint
Washington
D.C.

Copy

Farrell & Co
637 Chestnut St
Philadelphia May 27th 1889

R.

Hon Cornl M. Fox

Superintendent U.S. Mint - Philadelphia

Dear Sir

In reply to your verbal request, our Mr Remington (the writer) has obtained estimates for lowering the arches between the north wall of the new Basement Vault and the wall next to, and north of the smoke stack, making the first story floor in the area of the Mint, on a level with the present floor of the area; and also for lowering the grade of the passage in front of Vaults A. B. C. &c. to a level with the finished floor of the new Basement Vault, including the lowering of the floor of Vault "C" to the same level (about 30") and lowering the front wall and doors of Vault "C" and altering and adding to the lining, filling up the sides and

fronts, and replacing the floor with the same materials and construction as the present living, all of which we will do in a workmanlike manner, for the sum of one thousand four hundred and fifty Dollars ($1450.00). The entire estimate is made with the understanding that if the work is done, it must be done immediately, as we cannot do the work for this money, unless done at the same time with the rest of our work. In case you wish to have any or all of this work done, please take immediate steps to secure the necessary order from the Department, as we will be ready to tear down the arches over the rear end of the new basement inside within a few days, and if the remaining arches are to be lowered at all, the whole work should be done at the same time, in order to secure a good job.

Awaiting your reply, we remain

Very respectfully,

Farrell & Co

Melting & Refining Dpt. —
Philadelphia May 28th 89

Hon D. W. Fox.
Superintendent

Sir

You have honored me by a reference of the letter of Messrs Farrell & Co under date of May 27th for such suggestions and explanations as I may be able to make. In response I have to say that I went over the ground with Mr Pennington, and think the work specified by him ought to be done - and if done, it can be accomplished at very much less expense while Farrell & Co are building the basement vault. In explanation I would remind you that a considerable number of the floor girders were raised at some time in the past to afford head room over the old boilers. This, in the Central part of the Cellar. Farrell & Co's contracts for the new vault calls for the restoration of said girders

girders to the original level, as same inside the lines of the vault - thus furnishing a uniform floor overhead. But this change still leaves a few girders outside these lines, some 18 inches above the others, and above the level of the area of the Courtyard - and above the floor level of any of the other structures. I think it will be evident on inspection that all the girders should be lowered - and that only a slight additional expense will be entailed if the two or three girders not included in Farrell's vault Contract are lowered at the same time, and by same force. This is only a matter of a few hundred dollars and obviates and ugly break.

As to the other work for which they have specified, I would explain by calling attention to the fact that the level of the floor in the new basement vault is some 30" lower than the floor of the vaults "A, B, C" opening into the South basement Corridor. And as vault "C" is being broken through to furnish the only entrance into the new large vault, it will be

evident that unless vault "C" be lowered, there will be a very heavy grade to overcome in trucking into and from the new vault.

Messrs Farrell & Co propose to lower the level of the entire corridor, to that of the basement generally — and as I understand it, to the floor level of the new structures to be built on the site of the present grass plat, thus affording a uniform level in the basement.

Respectfully yours
D. K. Tuttle

SUPERINTENDENT'S OFFICE.

3. June 69

Sir;

In reply to yours of the 31st. ulto. I have to state that the inquiry of the Superintendent of the Mint at New Orleans with regard to our preparation of sweeps, was referred to our Melter and Refiner with the request to prepare a report on the subject. He could not give the matter his immediate attention in account of the excessive pressure of other duties, as it required much care and accuracy, and going into details.

He now informs me, he hopes by tomorrow to have his report completed for transmission to New Orleans, and

I may add, that it will be accompanied by carefully prepared drawings to illustrate our sweep-grinding machinery.

It will be immediately transmitted to Mr. Montegut

Very respectfully
Dan C. Wilson

Superintendent

SUPERINTENDENT'S OFFICE,

5 June, 1869

Sir:

Your letter of April 20th asking for information with regard to the process of preparing sweeps in the Melter & Refiner's Department in this Mint, preliminary to sale, - especially the mechanical part of the operation, and by what appliances - was duly received and immediately referred to our Melter & Refiner for answer. That officer was not able to give the matter immediate attention on account of the heavy pressure of his onerous official duties under the extraordinary demand on this Mint for coinage.

He has now however made a full

and detailed report accompanied by carefully prepared drawings. A copy of this report is herewith forwarded to you by mail & the drawings are sent, already mail, in a separate envelope. I hope the two together will give you a definite idea of our manner of preparing sweeps for sale.

Do we the kindness to acknowledge the receipt of the report and of the drawings?

Very respectfully

D. W. Fox

Melting & Refining department

Philadelphia June 3rd 1889

Hon: D. M. Fox

Superintendent

Sir

In response to the letter of Mr. Supt. Monte-
et of the Mint at New Orleans, with which you
we honored this department by reference,
information as to our method of treating
ores, I have to say that if we have been
successful in this treatment, no little credit
is due to the men in the dept. who carry out
faithfully the instructions given them. It gives
me pleasure to describe our methods and
where new appliances have been introduced,
I have thought it best to send working draw-
ings of such as have proved useful in practice.

Although devised by myself, they are open to the use of any who may find them worthy of adoption.

We classify and send our sweeps to the cellar under several designations according to their origin, and marked as such on the boxes.

1st. "Standard", or daily. These are from Gold and Silver ingot melting. In the melting room, all visible metal is picked up at the close of each day's work and put with filings and "Tops" to be weighed up among the returns for the day. The floor in the melting room is swept at the close of work, in the proximity of the furnaces and of the filing benches and this sweep is deposited, together with a small quantity of Borax, in a "sweat box". The contents of this box are charged into a

crucible which is no longer reliable for ingot melting, and this is placed in one of the furnaces last from the day's work, with enough fresh fuel to sweat down the contents – and left over night. The King thus obtained is assumed to be standard and is charged in with the work for ingot melting. The ashes, broken pots cups &c are sent to the sweep cellar as daily sweeps to be treated as hereafter described. Each Saturday the entire room is swept and the collected material treated as above.

General grains. When from proximity of furnaces working on different metals as Gold, Silver, Nickel or Copper, there is reason to suspect that the floor sweepings are other than standard metal, then the gathered material is still "sweated" but the

King obtained, is sent to the Refinery. All materials gathered in cleaning or repairing furnaces or chimnies &c take this course.

Granulations. When bullion is being granulated for the Refinery, the same care is taken to collect all visible metal after breaking up condemned pots, stirrers, &c, and this with the floor sweepings in the vicinity, & sweated down to a King for Refinery. Ashes and debris generally are sent to sweep mills and find their way into the general sweep.

Fine Gold. When melting fine gold from the Refinery or in making bars, the same precaution is taken as to visible metal, and sweating the floor sweep for a King to be passed to the credit of refinery operations.

but the ashes, broken pots &c are sent to sweep cellar plainly marked as "Gold", to be specially treated in amalgamator as hereafter described. The debris from Gold ingot making is treated in similar manner, but the product of visible metal obtained is passed to the credit of daily gold work, instead of Refinery.

Fine Silver from the Refinery - a making of bars, is treated as the Standard metal only that the product goes to credit of Refinery.

This much as to the classification and preliminary treatment of sweeps, in the melting room. It will be seen that it is made an object with us to send as little metal as possible to the sweep mills.

The actual sweep remaining, is gone

under heavy iron chasers in a mill similar in principle to the Chilian mill, but with a revolving bed, while the axle on which the rolls revolve is fixed. Such mills are in common use in the deposit melting rooms of the Mints, although of smaller size, and presumably they are familiar to the officers of the R. C. Mint. The ones in use here are made by Wm. Sellers & Co. and they would doubtless furnish any desired information.

It is important that the sweep be not ground too fine at one operation, as tending to enrich the sweep by pulverizing the pellets of metal, which would otherwise be caught in the screen. After a partial grinding the screen will have reduced the mass to a small bulk from which a

large part of the metal can be hand-picked, and thus saved from further abrasion.

The crushed sweep is then passed through the revolving screen, a drawing of which accompanies this letter. In the "Coarse" drawer are found buttons, flakes & of metal, which are melted down, and from precaution are sent to the refinery. The enclosed screen saves labor and avoids loss as well as inconvenience from intolerable dust. Other revolving screens have been tried, but without some special appliance to keep them from clogging with plumbago, fine clay &c they have proved unsatisfactory and been discarded. This difficulty is entirely overcome by the device which I have had embodied in the machine constructed

here at my instance.

The debris from Gold melting is ground as above, but kept apart - and what is not caught in a sieve is passed with water through a "Kent Amalgamator". This is an old fashioned machine, and doubtless there are better appliances available, if only known to us. The Kent machine is really only useful as a separator, and by levigation floats off the light particles, giving us what we call "washed grains", and which are very rich. The floated material is passed through and over mercury, but the catch here is very small in comparison. The tailings from the amalgamator are conducted into a slime box having an overflow into a well. The settlings in the box are dried

if the quantity is great - in a pan set over a small furnace. But since only the sweep from gold melting goes through the wet process the resulting mass is but a small percentage of our entire sweep. And by incorporating it in the wet state with a large quantity of the ordinary dust, we dampen this latter while insuring a thorough admixture since the whole must be passed twice through a sieve, and this can only be done when the wet portion is diffused throughout the mass.

The sweep thus made as uniform as possible by sieving is packed in barrels. When full a sampling thief is passed down so as to draw a core from top to bottom, diagonally from right to left, and a second

from left to right. These samples are stored until 10 barrels have accumulated when the weights are reported and the combined sample after a number of rievings to ensure uniformity, is sent to the Assayer.

If I have overlooked any point on which information is desired, I will cheerfully respond when my attention is called to it

Respectfully
D. H. Tuttle
M & R

Mint of the United States at Philadelphia, Pa.
SUPERINTENDENT'S OFFICE

P: June 89

Sir;

In reply to your inquiry of the 7th inst. I have to inform you that the bone-ash specified in voucher No. 450 in my Ordinary Expense Account for the month of May last, was for the use of the Assay Department, which requires a quality much superior to that which we buy under contract — as I have once before explained.

Hereafter this fact will be noted on the face of the voucher as you request

Very respectfully

[illegible]

Superintendent

Hon: J. P. Kimball
Director of the Mint
Washington
D.C.

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

5: June 1869

Sir;

In conformity with the provisions of section 3507 Revised Statutes, I have the honor to inform you that on the recommendation of the Assayer herewith enclosed, I have appointed Homer L. Pound, an assistant in this department @ $5.00 per diem, to take effect from date of oath and submit the same for your approval

Very respectfully

Wm. M. Pat

Superintendent

Hon: J. P. Kimball
Director of the Mint
Washington
D.C.

June 7th 89

Sir

In conformity with section 3350 H Revised Statutes, I would respectfully nominate Mr. Homer L. Pound for appointment as an assistant in this department, at a compensation of $5.00 per diem, — to date from conformation

Very Respectfully
Jacob B. Eckfeldt
Assayer

Hon. Daniel M. Fox
Superintendent

Mint of the United States at Philadelphia
SUPERINTENDENT'S OFFICE

5 June 69

Sir;

On the recommendation of the Assayer herewith enclosed, I have increased the Compensation of William H. Embrey, "Foreman" of the Assay Laboratory from $4.00 to $5.00 per diem: and the Compensation of Charles B. Walch, "Weigher" in the Assay Room, from $4.00 to $5.00 per diem: the increase to take effect from the 1st. July prox.; and submit the same for your approval

Very respectfully

Dan'l M. Fox

Superintendent

Hon. J. P. Kimball
Director of the Mint
Washington D.C.

Mint of the United States at Philadelphia, Pa.,
ASSAY DEPARTMENT.

June 7th 1889.

Sir

In conformity with section 3504 Revised Statutes, I would respectfully request that the compensation of Mr. Wm H. Embery foreman of Assay Laboratory be advanced to $5.00 per diem, and that the compensation of Mr. Charles B. Walch "Weigher" in Assay-weigh room be advanced to the same figures.

Mr Embery has been in the Laboratory since June 1873; and for attention, care and skill in his line of duty, has shown himself worthy to be entrusted with the arrangement of the General Work of the Laboratory.

Mr Walch has been in our Department nearly four years, I can say that we have found in him a very excellent and reliable assistant.

In asking for this increase, it is only just to state that it is not so much an increase of Compensation, as it is a restoration of pay as it existed in former years, (to those entrusted with the same character of work).

I would recommend that said increase of compensation date from July 1st 1889.

Very respectfully
Jacob B. Eckfeldt
Assayer

Sir.

I have the honor to present a requisition for a No. 5 S.A. press for cutting blanks, with fixtures, tube feed and one set of dies, in accordance with the proposal contained in the letter of the Farrel Foundry & Machine Co. of Waterbury Conn. of June 17th 1889 a copy of which is herein enclosed.

Very Respectfully
H. S. Steel
Coiner.

The Waterbury
Farrel Foundry & Machine Co.

Waterbury Conn. June 17th. 1889

Mr. W. S. Steel, Camden.

Dear Sir,

We are in receipt of your favor of the 15th. We proposed to build a No 5 S.A. Press for the trimming in question, and make one set of dies with fixtures and tube feed (see reference on page 61)

Price to be $600.00 net — f.o.b. Phila.

We sent you samples showing what could be done and we would have the work up to that standard.

Should like your order.

Yours truly,
W. E. Fulton Secy.

Mint of the United States at Philadelphia, Pa.
SUPERINTENDENT'S OFFICE,

21: June 1869

Sir,

Under the impression that the matter has been somewhat overlooked, I take the liberty of inviting your attention to the ventilating, heating, and sewage in connection with the proposed alterations of this Mint building.

I would suggest that the heating should be from a central station, the conveyance being through proper ducts to the several parts of the building requiring to be heated, the heater to be placed near the exhaust from the engines and supplied to the ducts by means of a pressure fan having its own engine attached. The air to be heated and supplied over the boilers

ing should be drawn through a draft from an elevated point to insure purity and freedom from dust, &c. The object of this method would be to introduce a supply and large quantity of heated & cool pure air throughout the building. It will also be observed that this will afford a most excellent system of ventilation at all times and be independent of the motive power of the building. The steam used has power to drive the blowers being taken their from the main boilers & one placed in position for that purpose.

The sewage system is of vital importance and should receive attention at the beginning & before any alterations are made. It is advisable that the Architect should be thoroughly advised &

the wants of the Mint in this particular, as the comfort of employees is intimately connected with their efficiency.

Will you kindly communicate with the Supervising Architect on this subject

Very respectfully

D M Fox

22nd June

Sir.

I find there is quite an increase of work in this department which I have tried to execute with my present force (which is now smaller than it has been for many years) but with my best efforts I am unable to produce the results I think most advantageous. My chief difficulty is in the preparation of dies for dies. For the want of more help I have to force my work which is very undesirable and liable to bring us into trouble.

At this time of the year I want to prepare for the coinage of next year, besides keeping the Mints all going as the contracts may require during the current year.

I have a years work in advance for medals for the War department, besides the Presidential and Indian Peace medals, and dies and seals for the Smithsonian Institute, and now the coinage dies for another Mint.

Nevada.

In consequence of having so much work, I am unable to get along expeditiously. I therefore ask the appointment of a man in this Department and have the honor to recommend one.

Very respectfully,

Chas. E. Barber.

Engraver.

Hon Daniel M. Fox

Superintendent.

Mint of the United States at Philadelphia, Pa.,
SUPERINTENDENT'S OFFICE.

24. June 89

Sir

We are making good progress with the Coinage and expect by Saturday next to make a very good report. What we accomplish is at some prejudice and injury to the health of the employees, especially the feminine portion of them: and in this connection it is proper to remark that there are many inquiries and much unrest with regard to the coming vacation. They are all anxious to know what arrangements they can make for leaving home during that period, and when. If therefore you can see your way clear to do so, I shall be glad if you could let me know what the duration of

the present summer's vacation is likely to be, and when it will commence?

I shall be greatly obliged by early advice from you on this subject

Very respectfully
Dan'l M Fox

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

June 26th 1889

Sir,

In making my requisition for funds for the current month sent to you on the 7th inst. I did it with a view of not exceeding my actual requirements for wages, and I called for $17,000 from the Standard Silver Dollar Appropriation.

On reviewing the probabilities, I am fearful lest when I come to make up the pay rolls there will be a deficiency which will embarrass me in making payments to the Employees at the beginning of next month, for services performed up to the last moment of the 29th. I therefore feel bound to make a special requisition at this time for say $2500, and I will ask you to kindly have a draft sent, so as to reach me on the morning of the 29th inst.

Very Respectfully.
Danl M Fox

SUPERINTENDENT'S OFFICE.

June 26th, 1889

Hon. [illegible] KIMBALL
Director of the Mint, Washington, D. C.

Sir:

I have the honor to report that the approximate amount and value of "Silver Bullion Purchased for Standard Silver Dollars" on hand at the close of business this day is 3,383,365.005 fine ounces, value $ 3,147,168.53 together with ——— Treasury and 1,221.x real gross ounces unassayed.

Also the amount and value of "Treasury" and "Domestic Purchases" and "Parted Silver" received during the month, and assayed, to date, to be as follows, viz:

Treasury Purchases 1,239,508.386 fine ounces; value, $ 1,147,431.60

Domestic Purchases 22,435.729 fine ounces; value, $ 20,827.90

Respectfully yours,

[illegible]
Superintendent

Mint of the United States at Philadelphia, Pa.,

SUPERINTENDENT'S OFFICE,

26. June 1887

Sir;

Under the information contained in the first paragraph of your letter of the 25th inst. I shall leave the proposed permanent alterations of the Mint out of view in arranging vacations for our operative force. I cannot see how to arrange to grant vacations through the three months of July, August, and September, so as to have only two-thirds of the working force present during those months, for the obvious reason that the maximum coinage for any given month cannot be got out by only two-thirds of the working force, especially under the excessive summer heat of this latitude.

The annual settlement is a necessity not only under the regulations but in the very nature of Mint operations. Whilst making the annual settlement our coinage operations must be suspended entirely. This is inevitable. During that time we have no use for the services of any of the operative force except the men actually employed in effecting the settlement, and there would be nothing gained in keeping the other operatives here, for there would be nothing whatever for them to do, and the two weeks required for this purpose can therefore be properly utilized as a vacation for those not needed, because they can be spared during that time, without detriment to the service.

I need hardly suggest that the two weeks taken up by the annual settlement

necessarily involves a loss in the out-put of Coin that cannot be made up, for the reason that a maximum four weeks Coinage cannot be done in two weeks time.

It is due to you to frankly inform you now that, it would not be practicable to make the annual settlement and turn out 1.900.000 Standard Silver dollars during the month of July: but we can and will get out in the last half of that month at least 1.000.000 Standard dollars. This you can rely upon but I cannot promise more.

In reply to your closing suggestion that "the short Coinage of any given month always gives rise to criticism in ignorance of any special reason for the short work", it is proper to recall the

3

fact that there has been no short coinage except during the month in which the annual settlement was made and that that settlement being compulsory furnishes a special and all-sufficient reason for short work. There is therefore no just ground for criticism from dissatisfied parties in this connection. Mint operations must be judged by their own nature, qualifying conditions, and necessities, with which interested outside parties do not seem to be familiar. They are probably not aware that the Mint cannot be in actual operation more than about 11½ months in the year.

Very respectfully

Jas. P. Kimball

27: June 89

Sir:

As suggested in your letter of the 24th inst. with regard to a supply of tools for the laboratory of the Print Bureau, it was referred to our Assayer, Chief Engineer, and Foreman of the Machine Shop, and as a result of their joint deliberations, I herewith enclose you a copy of a list of tools they suppose would answer your purpose.

I discover that there is an old tool chest in use here in former years that can be altered to suit your purpose and in its use be as good as new to you.

If upon examining the list you find it to be satisfactory and will so direct I will have them purchased. It will require a

meet to gather them together as some of them will have to be made.

In case you direct the purchase the cost of the tools specified in the list will be $96 21

If you direct the purchase to whom shall I make out the bill for payment or will you advance the funds for that purpose

Very respectfully
